

Medi-Caps International School, Indore
Circular for the Parents of Class IX

CIR/2026-27/48

August 20, 2026

Dear Parents,

Greetings!!

Subject: Introduction of Advanced Mathematics and Advanced Science.

This is to inform you about the introduction of the Advanced Level in Mathematics and Science under the new two-level examination structure. The initiative aims to provide students with an opportunity to demonstrate higher-order thinking, deeper conceptual understanding and the ability to apply knowledge beyond the standard curriculum.

From Session 2026–27, students of Class IX will have the option to appear for Advanced Mathematics and/or Advanced Science. The standard-level Mathematics and Science examination will remain compulsory for all students and will consist of an 80-mark examination of three hours. Students may independently choose to opt for the Advanced Level in Mathematics, Science, both subjects, or neither subject.

The Advanced Examination will be an optional 25-mark examination of one hour, comprising Higher Order Thinking Skills (HOTS)-based questions and covering additional prescribed content beyond the standard textbook syllabus. Students who opt for the Advanced Level will appear for this examination after completing the regular three-hour examination.

The Advanced Level will be treated as an additional academic achievement and the marks obtained will not be included in the overall aggregate or percentage. Students securing 50% or above in the Advanced Examination will have an appropriate remark on their marksheet indicating that the Advanced Level has been successfully cleared. In case a student scores below the prescribed passing criterion, no mention of the Advanced Level will be made on the marksheet.

It is important to note that this two-level structure will not apply to the 20-mark Internal Assessment in Mathematics and Science at the school level.

For Class X, Mathematics Advanced and Science Advanced will be introduced from Session 2027–28. The existing Mathematics Basic and Mathematics Standard scheme will be discontinued under the new structure, with the applicable transition provisions continuing for students of Class X during Session 2026–27.

Parents are requested to discuss the option with their ward and make a considered decision based on the student's academic interest, conceptual understanding, aptitude and willingness to undertake challenging and application-based learning. The school will provide further guidance regarding the selection process and examination schedule in due course.
