From Principal's Desk ....

As we reach the halfway point of the academic session 2025–26, it gives me great pride to reflect on the progress we have made as a school community. The first half of the session has been marked by curiosity, creativity, achievement, and an unwavering commitment to our core values.

At the heart of our philosophy is the belief that education is most effective when it is built on a strong partnership between the school and parents. Your involvement, encouragement, and support play a vital role in shaping not only your child's academic journey, but also their confidence, values, and emotional well-being. Together, we create an environment that empowers every child to explore their potential and grow into responsible, compassionate individuals.

We are delighted to share that the academic session 2024–25 has already been a year of commendable accomplishments:

- Our students achieved a 100% pass result in both Class X and Class XII Board Examinations, a reflection of their hard work, the dedication of our educators, and the support of families.
- In Balvigyan, our young innovators showcased outstanding scientific inquiry and creativity, securing recognition at both district and levels.
- Students who participated in various Model United Nations (MUNs) made their mark with confident articulation, diplomatic thinking, and a deep understanding of global issues.
- In the area of sports, our students brought home multiple accolades at interschool and zonal levels, exemplifying team spirit, discipline, and resilience.

This newsletter brings to you the journey so far in the direction of achieving the school's vision of "Empowering education for a better tomorrow." It is a celebration of our students' efforts and a testament to the vibrant culture of learning, leadership, and community that we continue to cultivate at our school.

As we look ahead to the second half of the session, we remain committed to nurturing well-rounded individuals through meaningful academic experiences, cultural exposure, and character-building activities. Let us continue working hand in hand to inspire excellence, uphold values, and empower every child to face the future with confidence and purpose.

Warm regards,
Yogeshwari Rathore
Principal

Peek a boo to Pre Primary activities

Ganesh Chaturthi Celebration

Children crafted eco-friendly Ganesha idols, blending devotion and creativity.

Rakhi Radiance

Handmade rakhis, cards, and a Class II assembly marked the festive celebration.

Peek a boo to Pre Primary activities

Poetic Expressions: Recitation Competition!

Young learners performed lively poems using expressive props.

Seeds Germination

Children explored nature by observing seeds sprout into plants.

Peek a boo to Pre Primary activities

Students explored colours and design by creating beautiful handkerchief patterns.

Tie and Dye

Solo Dance

Young dancers impressed with energetic performance and graceful moves.

Pathway to Primary activities

Twist the tale

Classes 4 and 5 participated in the Twist the Tale story telling competition, presenting creative versions of well-known stories with surprising endings. Students used props and shared both the original and their own twisted endings, showcasing their imagination and presentation skills.

The Inter-House Board Decoration

showcased teamwork and creativity, as students worked together to design vibrant and thematic displays.

Pathway to Primary activities

Self Introduction

A Self-Introduction competition was held to boost students'confidence and communication skills. All students participated, presenting their introductions in unique and creative ways.

Pottery and Pot Decoration

Students learnt the art of pottery from a skilled potter, then beautifully adorned their creations during the clay pot decoration activity, blending skills with creativity.

Earth Day Celebration

Medi-Caps Primary celebrated Earth Day with speeches, songs, skits, and creative activities like poster-making, slogan-writing, and plantation . Students pledged to save water, plant trees, and avoid plastic, spreading the message of “Reduce, Reuse, Recycle.

Marvels of Middle Block

Badge Making

Badge Making Competition was organized to encourage creativity and design skills. Students crafted unique badges reflecting the given theme with vibrant colors and ideas.

Greeting Card Making

Making greeting cards let students tap into their artistic side and thoughtfulness.

Math Quiz

Taking part in the Math Quiz challenged students to solve problems quickly.

Marvels of Middle Block

Folder Making

A Folder-Making activity was held to enhance students' creativity and craft skills. They designed colorful, well-organized folders using innovative ideas and decorations.

Fashion Show

A Fashion Show was organized where students showcased creative attires made from newspapers. The event highlighted their innovation, design skills, and commitment to recycle.

Debate Competition

Debating helped students sharpen their speaking skills and think on their feet.

Spectacles from Senior block

Rakhi Making

Senior block celebrated Rakhi Making Competition on August 7, 2025 , showcasing students' creativity ,cultural spirit and sibling love in a joyous festive atmosphere.

AD-Mad Show

On April 23, 2025, Medi-Caps senior students showcased creativity, teamwork, and public speaking in the Ad-Mad Show, impressing with original scripts and dynamic performances.

Idol Making Competition

On 23rd August 2025, Senior Block held a vibrant Inter-House Ganesha Idol Making Competition, where senior students from four houses showcased creativity and eco-friendly artistry, celebrating culture and tradition.

How is a big population beneficial to India?

ANERI PODDAR
Class - 9th E

India's large population is not a burden — it is our greatest strength. With one of the world's youngest and most dynamic populations, we are a nation powered by the energy of youth, the wisdom of tradition, and the drive to shape a better future. Our vast human resource fuels every sector — from agriculture and industry to technology and innovation — making India a global powerhouse of talent and ideas. A population of over 1.4 billion creates one of the largest consumer markets in the world, attracting global investment and driving rapid economic growth. It offers an unmatched pool of skilled minds — doctors, engineers, scientists, entrepreneurs, and creators — who are shaping not only India but the entire world. This population pushes demand for infrastructure, education, and innovation, leading to continuous development and opportunity. More than just numbers, our people represent resilience, diversity, and potential. They are the heartbeat of the nation and the builders of its future. With the right guidance and vision, this strength will lead India to unmatched heights. Our population is not just our pride it is our power. And with it, India is unstoppable.

मेरा स्कूल

मेडीकैप्स है मेरा स्कूल
खिलते है इसमें सुंदर फूल
कितना सुंदर कितना प्यारा
सबकी आँखों का तारा

चारो तरफ है प्रशंसा भारी
इसकी करते सब नर नारी
देशप्रेम के मन्त्र न्यारे
जपते जिनको बच्चे सारे

अनुशासन की वर्दी धारे
यहाँ के बच्चे कभी न हारे
शिक्षक यहाँ के सबसे अच्छे
ज्ञान और शिक्षा देने में सच्चे

शिक्षक सब में ज्ञान भरे
सब बच्चो के सपने साकार करे
किसी भी बात की कमी न करते
हर दम हमारा ज्ञान बढ़ाते

क्यों न हो हमें इस पर नाज
विद्यालयों का यह है ताज ।

Beyond the final breath, The mystery of after life.

"Maybe death isn't the end of our story, but the part that's too vast for words."Our mind usually comes across with a lot of strange questions and theories. One of the most unconventional of these theories is that of the life after death. This theory traces its roots from several ancient texts and beliefs. For centuries, humans have looked up to religion, philosophy and science to find answers. The idea of afterlife has been a deeply imbedded part of human culture. As per the scientific perspective, studies of near-death experiences often show visions of lost loved ones, light, peace etc.These people are often left transformed after such experiences, convinced that they have seen a glimpse of something beyond our imagination. Traditions across the world have their own perspective towards afterlife. Some believe in heaven and hell, whereas some believe in the cycle of reincarnation. It's still not clear whether it's an illusion or insight.Death remains an experience which no one can avoid. It's still a mystery whether it is a full stop or the opening of a new story. It continues to challenge, terrify and fascinate us.

The Version of Me I Forgot

There comes a time in almost everyone's life when we look at ourselves and think "Is this really me?" It doesn't always look like pain. Sometimes, it's feeling invisible, that ache of not feeling seen, not feeling enough, not feeling like 'me'. I've been there too. I've seen cheerful, bright-eyed versions of myself slowly fade into someone I couldn't recognize. Someone who stopped believing and who started settling. And in those moments when everything felt like too much, when I was almost ready to give up on myself someone didn't give up on me. For me, that Someone was a Teacher. Not just a person who taught from a textbook, but one who saw beyond that. A teacher who believed in the version of me that I thought had disappeared. Believed, just because they could see what I had stopped seeing. And that? That changed everything. They didn't fix all my problems. But they made me believe that I could. They didn't even realise how much they have healed me. Their words? It felt like strength to me. And sometimes, that's all it takes. Just one person. One teacher. One believer. One moment of being seen. Because the truth is, we all go through phases where we look at ourselves and ask "what went wrong?". But what we often forget is we're still growing. Still becoming. Still worth believing. So if you're reading this and you've ever felt lost, stuck, invisible I want you to know, you're not alone. And maybe one day, you'll find your one person. Or maybe you'll be that person for someone else. And this is The Version of Me I Forgot, Until Someone Believed in Me.

Road Trip

BHANI KANJNANI
Class-4th 'D'

Start the motor, off we go. Through the dark and starry glow. We zoom near and we zoom far, In our speedy little car. Away from the large and busy tower, To countries barns and fields of flower. And when our trip is at an end, Our car takes us home again.

Perspective

Perspective is a crucial aspect of human character. It is the strong cornerstone over which the great wall of human personality is built. "Perspective defines ones' sight and view of the world"

We often say put your foot into another's shoe sand that is how the perspective is defined. Imagine any situation, depending upon the perspectives and understanding each one would may have a different opinion based upon their perspective.

To explicitly understand a situation one must understand that their view is just view and they should keenly understand and should know about others perspective indeed! In addition, do always remember that-

- The only thing you sometimes have control over is perspective. ... Always reform your thoughts and reform your mentality through distinguished perspectives.

GETTING OLDER AND WISE

The day came, when I had to grow older,
Close my childhood dreams in a silent folder.
Learned to detach from what I love the most,
Yet feel so alone by life's crowded coast.
Responsibilities knock, creativity hides,
Though it's precious, I feel bound inside.
Letting go with a smile that's fake,
While my heart carries every silent ache.
The day came... and I stood still,
With tearful eyes and a trembling will.
Yet hope rises...soft, divine and true,
That they'll still walk this life with me too.

RAGHUNANDAN SULE
Class- 4th 'G'

One of My best Visiting placces.

My favourite place is the beach. There's an undeniable magic to the ocean's vastness, the rhythmic crashing of waves, and the feeling of sand between my toes. The beach offers a unique blend of tranquillity and exhilaration, making it my go-to destination for relaxation and rejuvenation.

The first thing that draws me was me to the beach is the sensory experience. The sound of the ways is incredibly calming, a natural white noise that washes away stress.

The salty air invigorated the senses, and the warmth of the sun on my skin is simply blissful walking along the shore, feeling the cool water gently lap at my feet, is a grounding experience.

I Love Reading Books

SHIVANYA JAISWAL
Class-5th 'B'

I love reading books. Everyday,I pick up a book and enter the new world.The stories take me on exciting adventures,and I here new things. I like to read in a quite corner, surrounded by the smell of pages.

The characters become my friends and its journeys inspire my reading helps me relax and Imagine wonderful places.

Whether it's a rainy day or a the sunny afternoon,a good book is my perfect companion.

मेरा तिरंगा

KRITIKA LACHETA
Class- 4th 'D'

"न जाने कितने शहीदों ने
अपनी कुर्बानी चढ़ाई थी
तब जाकर मेरे देश ने
सच्ची आजादी पाई थी "
चलो चले उसे राह पर
जहां वतन की शान है।
तिरंगा लहरा आसमान में ,
यही हमारी शान है।
वीरों का बलिदान यहाँ ,
माटी की पहचान यहाँ।
हर बूंद में बसाता है ,
भारत मां का मान यहाँ ।
चलो मिटाए अंधेरा,
ज्ञान का दीप जलाएं।
अपने भारत को फिर से
सोने की चिड़िया बनाए।
जय हिंद

A Flower's Smile

Riddhi Saini
Class- 4th 'G'

Flowers bloom with colours bright, waking up morning light.
Roses red and tulips tall, smiling gently, one and all.
They don't speak but still they say,
" Spread some joy along your way!
Soft and kind, they show us how to live with love, here then now.

Kartik Nagda
Class-8th 'E'

How to Study

This is the question for the majority of people in our school and nearby area and even it can be your question too? Study is the most important thing in our lives and through it we can go to our highest potential of our mind and achieve our goals.
The quote "education is not the learning of facts, but the training of the mind to think" By Albert Einstein also states that if the education is treated with high determination our mind starts to think and this thinking can be yours too may be the next startup idea of millions of dollars or it can be a new career idea to achieve for your delightful future.
Some techniques of the study are mentioned below through which you can easily study and improve your minds:

1. The Pomodoro technique: This technique states that you should study with 25 minute sessions and after the completion you should take 5 minute breaks because brain is not an engine it is a biological computer.
2. Time slot technique: This technique states that you should make time slots for study all your subjects for example you are studying 1 pm to 2 pm {Mathematics}, 3pm to 4pm {science} etc.
3. The target technique: It is a technique where you have to make your targets and study till they are completed which will make you good for study and stuff.

These were techniques by me so now I can say that you will be.

1. Disciplined
2. Consistent
3. Or maybe next multi-billionaire

Cherishing Indore's Natural Beauty

I am a human, I am tired of cities, I am going to nature to find some peace.
Let us cherish nature, in all its grace, and preserve its beauty in this sacred place.
In Indore's embrace, nature's beauty shines, where trees and tall flowers bloom in lines.
Our Indore is a city with so fair, clean streets and roads beyond compare.
The sweeper works hard, day and night, to keep our nature a beautiful sight.
In nature's arms, we find our peace,In Indore's heart, a heaven to release.
We'll do our part with the happy grin, to keep our nature, a beauty beautiful win.

Digital World Our Bright Playground

Digital world, so bright, so wide,
With just one click, we're side by side.
Learning's faster, ideas fly free,
A treasure chest of knowledge for you and me.

With phones in hand and screens that glow,
We surf the waves where data flows.
We study online, we shop in a flash,
In this magic world where dreams can dash!

From classrooms virtual to cozy homes,
This digital age is where we roam.
Every tap, every swipe we make,
Builds the future path we take.

We video call with a smiling cheer,
Even if friends are far, they feel so near.
We share our memes, our laughs, our art,
Connected forever, heart to heart.

A click, a scroll, and here we meet,
In this buzzing world, so fast, so sweet.
From morning till night, in work and play,
Our digital adventure is here to stay!

Campus Chronicles

MRUNMAI AMBORE
Class 8th 'E'

Unto the light of the golden dawn

Ere' freedom's dawn lit up our skies,
We stood as one, with steadfast eyes.
Through chains and trials, dark and long,
We marched with hope, our spirits strong.
By sacrifice and battle's flame,
We carved for us a nation's name.

Seventy-five bright years have flown,
Since liberty became our own.
From fields of green to bustling streets,
Her heartbeat in our soul repeats.
Yet still the torch must brightly stay,
To guide us through each passing day.

O citizen, stand proud and free,
Guard well our land, from shore to sea.
With justice, truth, and courage near,
Keep India's glory ever clear.
So shall her crown forever shine,
In golden light, by our design.

SAKINA KANCHWALA
Class-12th 'A'

Brain Drain- India's Hidden Loss

Picture this: 1.8 million Indian students and 60,000+ skilled professionals left our country last year. Add 2.5 million more migrants, and you see the true picture of India's brain drain.

Brain drain means skilled people leaving India to shape futures abroad. Here's the reality: a young professional in India often struggles with limited job opportunities and underpay against global standards. Even those passionate about research and innovation find themselves hindered by outdated facilities and negligible funding. Add slow bureaucracy and corruption – the talent feels suffocated. Naturally, seeking a place where work is valued.

As Nithin Kamath warned, “While Americans invest in India, our brightest are ready to leave.” His words are a brutal reminder of what's at stake!

The solution? India can keep its talent by improving work culture, cutting red tape so ideas move faster, boosting salaries in key sectors so youth don't feel undervalued, and funding startups to turn innovation into opportunity. Society must value skill over connections and support innovators. Like 'Digital India' and 'Make in India', we need 'Keep in India' to hold our brightest minds. With the right support, India's future will not just stay—they'll lead and thrive here.

Importance of Reading Books

REYANSHI BANSAL
Class 8th 'H'

In a world full of scrolling, reading is the real pause button.

In today's world filled with screens, we need a break from those constant notifications and distractions. Books are the 'BREAK' that we need.

Now you might wonder that we learn those things from the internet too but remember that screens can open windows to the world but books open doors to the soul. The internet will show you the world but books will teach you to live in it.

Books offer deep knowledge, reduces stress and improves mental health. There are e-books too but a 2003 study “**Better retention with printed text**” conducted by Kate Garland shows that while people may understand the main ideas in both formats but printed books tend to create a deeper, more lasting memory. And here comes 'difference between remembering and knowing'. The best WI-FI connection is between your mind and a good book.

Indore hosts lawn ball training camp

Our Sports Reporter

As part of the ongoing efforts to promote lesser-known sports among the youth, a one-day training camp was successfully organised under the Lawn Ball Development Programme by the District Bowling Association Indore at Medicaps International School on Wednesday.

The training camp was led by Sanskar Gaur, the only athlete from Madhya Pradesh to represent the state in Lawn Ball at the National Games held in Uttarakhand. Gaur conducted intensive sessions to introduce young participants to the technical aspects and strategic nuances of the sport.

The primary objective of the initiative was to engage school and college students with emerging sports like lawn ball, fostering awareness, participation, and a competitive edge from an early stage.

Speaking on the occasion, Bhavesh Bundela, sports officer of Medicaps International School, lauded the initiative and motivated the students to explore opportunities in alternative sports disciplines beyond mainstream games.

President of the District Bowling Association Indore, Gautam Lashkari, and secretary Shrikant Adwal emphasised that this was just the beginning of a broader vision. "We aim to take this movement to various educational institutions across Indore, enabling youth to discover and develop their skills in lawn ball," they stated.

They further added that through such programmes, students will not only gain exposure to the sport but will also be prepared to compete at higher levels, including district, state, and national championships.
